the 1990s, the number of people in the world who are illiterate has increased from 1.2 billion to 1.5 billion. The number of illiterate people in the world is projected to reach 1.7 billion by the year 2015. The number of illiterate people in the world is projected to reach 1.7 billion by the year 2015.

the β phase of the polymer. The β phase is the more ordered phase and is characterized by a higher density and a higher melting point than the α phase. The β phase is the more stable phase and is the one that is observed in the pure polymer. The α phase is the less ordered phase and is characterized by a lower density and a lower melting point than the β phase. The α phase is the less stable phase and is the one that is observed in the pure polymer.
